## **DETAILED ACTION**

### ***Election/Restrictions***

1. Claims 1-5 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 11/24/2004.
2. Applicant's election without traverse of claims 6-19 in the reply filed on 11/24/2004 is acknowledged.

### ***Specification***

3. The abstract of the disclosure is objected to because of the use of the legalese language "comprising". Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 6, 9, and 11 are rejected under 35 U.S.C. 102(e) as being anticipated by Yeager et al. (US 6,507,049).

Regarding claim 6, Yeager ('049) teaches in figure 2 a method for manufacturing a reflecting displays, in cooperation with at least a light source (4), comprising the

device for flat panel following steps: providing a nonconductive base (17) having at least a groove (no number) for locating said light source; securely positioning a reflector in said groove of said nonconductive base; and securely positioning said light source in said groove of said nonconductive base wherein said reflector is located between said nonconductive base and said light source.

Regarding claim 9, Yeager ('049) teaches light source is a light emitting diode.

Regarding claim 11, Yeager ('049) teaches the nonconductive base is made of plastics, polyester or a non-metal material.

### ***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yeager et al. (US 6,507,049) in view of Suzumura et al (US 6,791,034).

Regarding claim 7, Yeager ('049) teaches all of the claimed limitations except for the reflector being attached by adhesive or hot-pressing.

Further regarding claim 7, Suzumura ('034) teaches the use of an adhesive to attached components to a plastic base for the purpose of quickly and securely attaching components to a substrate.

Hence it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the adhesive of Suzumura on the display of Yeager for the purpose of quickly and securely attaching components to a substrate.

Regarding claim 12, Suzumura ('034) teaches the base is made by injection molding.

***Allowable Subject Matter***

7. Claims 8 and 10 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
8. Claims 13-19 are allowed.
